

REME ION

The REME ION improves air quality in your home or office by efficiently reducing allergens, mold, odor, bacteria, and VOCs (airborne chemicals). Employing advanced oxidation and ionization, the REME ION quietly cleans the air you breathe.

REME is an advanced oxidation technology utilizing UV light focused on a ceramic catalyst to produce light airborne hydro-peroxides capable of quickly reducing organic pollutants.

Bipolar ionization helps accumulate tiny airborne particles through negative and positive charges. The larger particles are more easily filtered by air conditioning filters.

Specifications

Dimensions:	2.76" x 2.76" x 6.9"
Product Weight:	13.6 oz.
Electrical:	12 VDC 0.4 A
Power Consumption:	5 watts
Treatment Area:	400 sq. ft.
Technology:	REME LED with Bi-Polar Ionization
